Suhani Shukla

+91 94078 77617 — shukla.suhani@gmail.com — linkedin.com/in/suhani-shukla20

Summary

Computer Science undergraduate specializing in Cyber Security with a strong foundation in systems programming, cryptography, data structures, and network architecture. Experienced in secure software development, protocol analysis, and performance-focused application design. Proficient in C++, Python, and Java with working knowledge of multithreading concepts, TCP/IP networking, and secure system configuration. Passionate about building resilient and secure distributed systems with a focus on scalability, reliability, and algorithmic efficiency.

Education

VIT Bhopal University — Bhopal, MP
B.Tech. in Computer Science and Engineering (Cyber Security and Digital Forensics) — Aug 2023 – May 2027

- CGPA: 8.22/10

Sri Sathya Sai Vidya Vihar — Indore, MP
High School — May 2023

- 10th Grade: 92%
- 12th Grade: 85%

Technical Skills

Programming Languages: C++, Python, Bash, Java, SQL, HTML/CSS

Security and Forensics Tools: Autopsy, FTK Imager, Steghide, John the Ripper, Wireshark, Hashcat, OWASP ZAP

Core Skills: Digital Forensics, Network Security, Cryptography, Steganography, Vulnerability Assessment, Data Structures and Algorithms, Object-Oriented Programming, Secure Software Design, Operating System fundamentals, Figma Design

Experience

- **Cyber Security Intern** — Feb 2025 – Mar 2025
  The Red Users
  - Managed firewalls and monitored network traffic with Wireshark to detect security threats.
  - Performed vulnerability assessments on web applications using OWASP ZAP and WebGoat; identified and documented XSS and SQL injection vulnerabilities.
  - Implemented security best practices to enhance network and application defenses in lab environments.

Projects

File Metadata Analyser

- Developed a secure Flask-based web application to analyze uploaded files by extracting metadata, generating cryptographic hashes (MD5, SHA-256), and performing threat intelligence checks.
- Integrated VirusTotal API (v3) to classify files as Safe, Suspicious, or Malicious based on multi-engine detection results and implemented custom risk evaluation logic.
- Designed and implemented a PostgreSQL database schema to store file records, metadata, hash fingerprints, and threat analysis results.

Cipher Suite

- Developed a Python (Tkinter) desktop app with six classic cipher algorithms for secure message encryption and decryption.
- Designed a responsive GUI with dynamic input validation and modular architecture for scalability.
- Improved application robustness through comprehensive error handling and clear, user-friendly output.

Awards & Honors

- Awarded the Reliance Foundation Undergraduate Scholarship for Academic Excellence (2023), selected from candidates nationwide based on merit.
- Advanced to Round 2 in the SolVIT Hackathon, a competition organized by VIT Bhopal (2024).

Certifications

- Google Cybersecurity Professional Certificate
  Google, 2026
- Blockchain and its Applications
  IIT Kharagpur, 2025
- Ethical Hacking Essentials
  EC-Council, 2025
- Introduction to Generative AI Specialization
  Google, 2024
- Introduction to Cybersecurity Essentials
  IBM, 2024

Interests

Literature, toponymist, Wordle and Sudoku, crocheting, embroidery, and puzzle solving.
